

LAB 2 – AGILE BACKLOG CREATION & SPRINT SIMULATION IN JIRA

Automated Rubric Assignment Evaluator (ARAE)

Student Name	C SREEKRISHNA KOUSHIK
SRN	PES1UG24CS128
Section	5C
Project	Automated Rubric Assignment Evaluator
Tool	Jira Software

1. Aim and Objective

The aim of this lab is to convert functional requirements into Agile backlog items, prioritize and estimate them, simulate a Scrum Sprint in Jira, and analyse the Sprint progress using a Burndown Chart.

2. Jira Backlog and Story Points

Issue	User Story	Story Points
ARAE-6	Upload Student Submission	3
ARAE-7	Execute Automated Test Suite	5
ARAE-8	Generate Rubric Score Breakdown	8
ARAE-9	Configure Rubric Template	3
ARAE-10	Validate Rubric Weights	2
ARAE-11	Assign Anonymous Peer Reviewers	5
ARAE-12	Submit Peer Review Feedback	5
ARAE-13	View Score Dashboard	3
ARAE-14	View Test Results and Peer Feedback	3
ARAE-15	Override Rubric Score	3
ARAE-16	Ensure Submission and Data Retention	8
ARAE-17	Handle Concurrent Submissions	8

Total Story Points planned for Sprint 1: 56

3. Jira Evidence / Screenshots

The following screenshots provide evidence of the backlog, Story Point assignments, Sprint board, and Burndown Chart.

Jira interface showing the "ARAE board" (Automated Rubric Assignment Evaluator) in the "Backlog" view. The board lists 17 tasks, each with a status, priority, and assignee.

Task ID	Task Name	Status	Priority	Assignee
ARAE-6	Upload Student Submission	Automated Submis...	To Do	3
ARAE-7	Execute Automated Test Suite	Automated Submis...	To Do	5
ARAE-8	Generate Rubric Score Breakdown	Automated Submis...	To Do	8
ARAE-9	Configure Rubric Template	Rubric Configuration	To Do	3
ARAE-10	Validate Rubric Weights	Rubric Configuration	To Do	2
ARAE-11	Assign Anonymous Peer Reviewers	Peer Review Mana...	To Do	5
ARAE-12	Submit Peer Review Feedback	Peer Review Mana...	To Do	5
ARAE-13	View Score Dashboard	Student Score Rep...	To Do	3
ARAE-14	View Test Results and Peer Feedback	Student Score Rep...	To Do	3
ARAE-15	Override Rubric Score	Faculty Score Man...	To Do	3
ARAE-16	Ensure Submission and Data Retention	Automated Submis...	To Do	8
ARAE-17	Handle Concurrent Submissions	Automated Submis...	To Do	8

Jira interface showing the "ARAE board" (Automated Rubric Assignment Evaluator) in the "Active sprints" view. The board is organized into three columns: TO DO, IN PROGRESS, and DONE.

Column	Task ID	Task Name	Status	Priority	Assignee
TO DO (10)	ARAE-8	Generate Rubric Score Breakdown	Automated Submission Evaluation	8	
	ARAE-9	Configure Rubric Template	Rubric Configuration	3	
	ARAE-10	Validate Rubric Weights	Rubric Configuration	2	
	ARAE-11	Assign Anonymous Peer Reviewers	Peer Review Management	5	
	ARAE-12	Submit Peer Review Feedback	Peer Review Management	5	
IN PROGRESS					
DONE (2)	ARAE-6	Upload Student Submission	Automated Submission Evaluation	3	
	ARAE-7	Execute Automated Test Suite	Automated Submission Evaluation	5

4. Sprint 1 Summary

Sprint	ARAE Sprint 1
Dates	4 September 2026 – 8 September 2026
Planned Story Points	56
Completed Story Points	56
Remaining Story Points	0
Final Status	Sprint completed

5. Questions and Answers

1. Did your estimations reflect the actual effort?

The Story Point estimates provided a useful relative measure of the effort required for the User Stories. The estimates considered the complexity, amount of work, risk, and uncertainty of each requirement. Since all 56 planned Story Points were completed during the Sprint, the estimates were reasonable for this simulation. However, Story Points should not be interpreted as exact hours because they are intended to represent relative effort.

2. Was your backlog well-prioritized?

Yes. The backlog was organized according to the importance and user impact of the requirements. Core functions of the Automated Rubric Assignment Evaluator were given higher priority, while supporting functionality was organized accordingly. This helped the Sprint work to be selected and completed in a structured manner.

3. How did your simulated sprint align with your plan?

The simulated Sprint aligned well with the plan because the selected User Stories were progressed through To Do, In Progress, and Done, and all 56 planned Story Points were completed by the end of the Sprint. The work was not completed at a perfectly uniform rate on every day, but the final Sprint objective was achieved successfully.

4. What insights did the burndown chart give about your team's capacity?

The Burndown Chart provided a clear view of how the remaining workload changed throughout the Sprint. It showed that the team eventually reduced the planned workload from 56 Story Points to 0. The chart also showed that work was completed in noticeable steps rather than through a perfectly linear decline. This indicates that the team's progress can vary during a Sprint and that the chart can help identify delays, uneven progress, and whether future Sprint commitments are realistic.

6. Conclusion

In this lab, the Lab 1 functional requirements were converted into Epics and User Stories in Jira. The backlog was prioritized and Story Points were assigned using Fibonacci-based estimation. A Scrum Sprint was simulated by moving User Stories through To Do, In Progress, and Done. Finally, the Burndown Chart was used to analyse Sprint progress. The Sprint finished with all 56 planned Story Points completed and 0 Story Points remaining.
